

Business Continuity Standard

Owner: Chief Operating Officer · Version 2.0 · Effective 1 January 2026

1. Recovery objectives

Each critical or important function has a recovery time objective and a recovery point objective. These are reviewed annually and tested at least once every twelve months.

Function	Recovery time objective	Recovery point objective	Test frequency
Payments processing	2 hours	15 minutes	Quarterly
Customer onboarding	8 hours	4 hours	Annually
Internal reporting	48 hours	24 hours	Annually
Corporate email	4 hours	1 hour	Annually

2. Invocation

The Chief Operating Officer or a nominated deputy may invoke the continuity plan. Invocation must be recorded in the incident log within 1 hour and notified to the Board within 24 hours.

3. Third-party dependencies

Where a critical function depends on an external provider, the contract must include a defined exit period of no less than six months and an obligation to return data in a documented, machine-readable format.

4. Testing

A full failover test of payments processing is carried out quarterly. Results are reported to the Board within 30 days of the test.
